

# WHERE TO CODE? INSTALLATION OF PYTHON IDE

## STEP 1

go to  
<https://www.anaconda.com/download/>

## STEP 2

Download your respective operating system version like windows, ubuntu or mac.

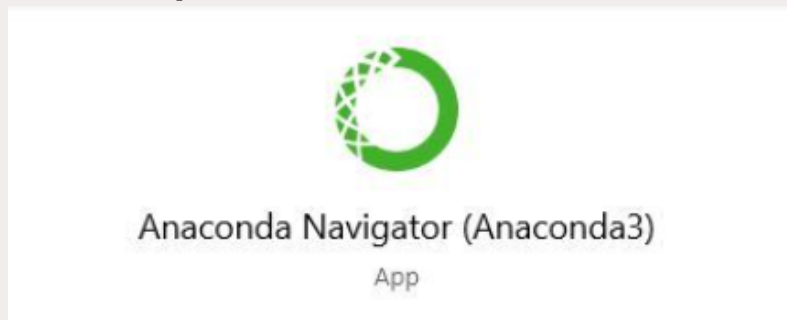

## STEP 3

Install the Anaconda.

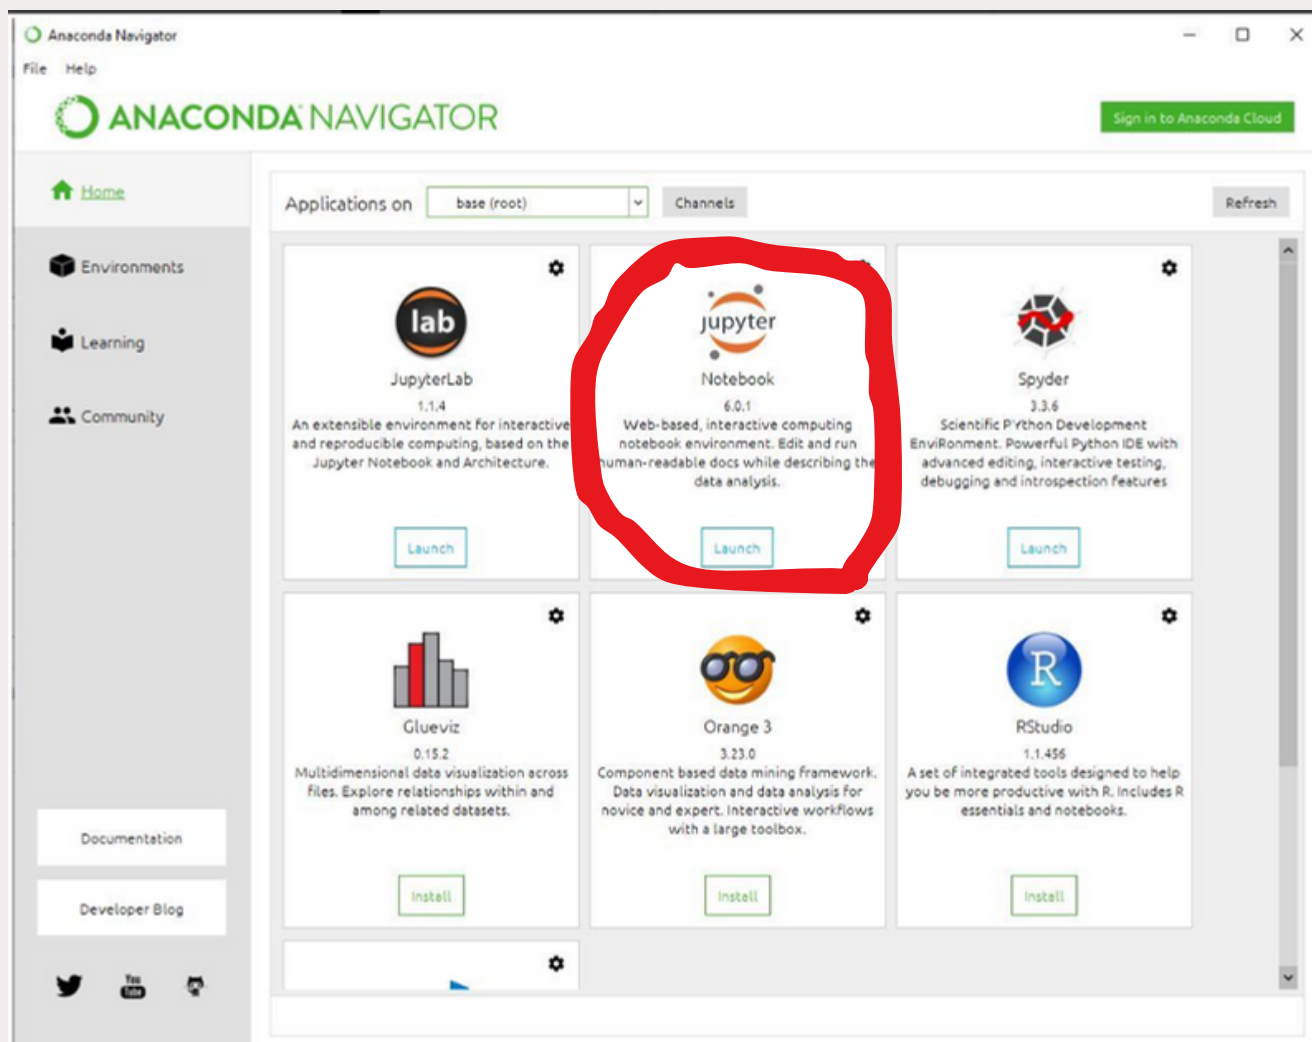

@PYTHONTECHY

# AFTER INSTALLATION OF ANACONDA

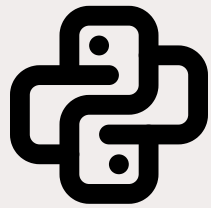

## 1. Open Anaconda Navigator

## 2. It will look like this window.

## 3. Launch the Notebook. The one which is highlighted.

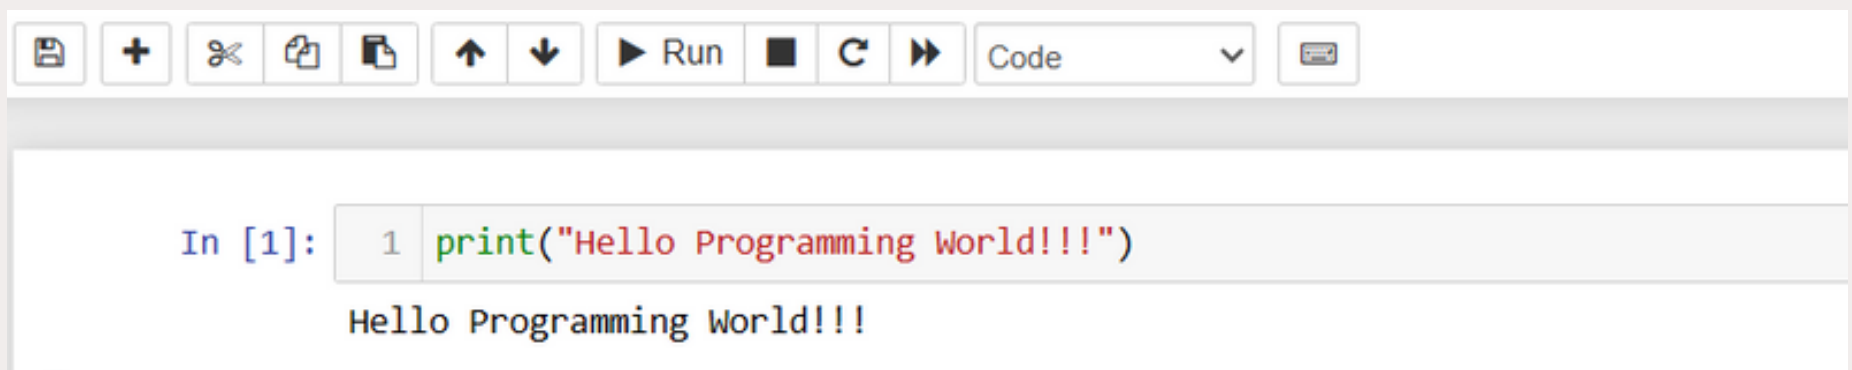

# FIRST “HELLO TO PROGRAMMING WORLD”

4. Click on New -> Python 3 (ipykernel)

5. Type “Hello Programming World” and then press 

# Congratulations!

*You have written  
your first code.*

First baby step into the world of programming...
